

---

We could spend hours bending your ear on how *Spitfire's Project Management* software will improve internal operations and project-partner collaboration, as well as reduce risk— *but* we thought it would be better for you to hear what some of our Customers have to say.

---

Harrison, Walker, and Harper continually implements tools to enable our team to manage our construction projects in the most effective way possible. We selected Spitfire to enhance our Microsoft Dynamics SL experience. While our team has realized value from Dynamics SL, Spitfire's Project Management provides our project managers with a one-stop shop for their jobs. By seeing all of their financials, project-related documents and archived files in one place, our project managers are more empowered to be successful. The Spitfire team has been very helpful in not only providing assistance with our Dynamics system, but also offering excellent training on their product.

*Brandon Hoog*  
Director of Innovation Technology  
Harrison, Walker & Harper, LP

"BP Air has gained business efficiencies across the company by implementing one integrated Business Management system. The unique combination of having project accounting and document control, combined with Spitfire's browser-based project management and workflow/routing, provides a powerful integrated environment to help us manage our business. This has provided anytime, anywhere project information in one central system, reducing manual keying of information and business risk."

*Lisa Caruso*  
VP Finance & Administration  
BP Mechanical Corp.
