

## Five reasons why one seam is better for your roof than ten.

1. Faster, higher quality installation.
2. Non-disruptive to building operations.
3. Virtually maintenance-free durability.
4. Proven long-term, watertight performance.
5. Exceptional energy efficiency.

Each Duro-Last® roofing system is precision fabricated to perfectly fit the building it's designed for, right down to the stacks and flashings. While other systems require extensive seaming on the rooftop to install, every customized Duro-Last roofing system is delivered to the job site with up to 85 percent of the membrane seaming already completed in our factory. So your roof goes on faster and delivers superior, watertight protection. Best of all, Duro-Last's proven performance means your investment will continue to pay off for years to come, with significant energy savings, little to no maintenance, and the best warranties in the business.

The numbers all add up: Duro-Last is the best roofing system for your building.
