

"At the end of the day, your 3D model will most probably end up in Tekla Structures, so why not start with it!"

- Ray Young, Arup

Time to build

Consider Tekla Structures as an extra hand that allows you to concentrate on the essentials: delivering accurately designed projects on time and on budget. Tekla Structures 13 brings you faster coordination with reference models, enhanced performance of large, data-rich Tekla models, and better quality engineering drawings.

For over 40 years, Tekla has provided software solutions to the building and construction industry. Tekla Structures is a building information modeling (BIM) tool that streamlines the delivery process of design, fabrication, and construction organizations.
