

Blue Line Extension to Largo - Addison Route Stations & Parking Facilities

Washington Metropolitan Area Transit Authority

Washington, DC

**Winner of the
2005 DBIA
National Design-Build
Excellence Award for
Transportation Projects
over \$50 million**

The Clark/Kiewit
and HSMM/STV
joint ventures
congratulate the
entire design-build team
on this significant
achievement.

The Blue Line Extension
is WMATA's first
design-build station
project and reflects
WMATA's new vision for
the Washington, DC
metrorail system.

Largo Town Center Station

A metrorail station with at grade concourse and elevated platforms, fare gates, twin 6-level parking structures with 2,200-vehicle capacity and connecting pedestrian/vehicle bridge, and station plaza and pavilion.

Morgan Blvd Station

A metrorail station with elevated concourse and at-grade platform, fare gates, station plaza and pavilion; and childcare center with playground.
