

Global Water Solutions

Excellence is about more than meeting contracted requirements. Our world class performance in research, design and construction makes Doosan Hydro Technology the best choice for water, wastewater and reclaimed water treatment and production. Our financial strength coupled with superior customer service separates us from other service providers. When the standard is excellence, the company is Doosan Hydro Technology.

When Experience Counts...

- Engineering, procurement and construction of water and wastewater treatment plants
- Brackish and seawater Reverse Osmosis and Nanofiltration plants
- Turnkey installation and plant retrofit and expansions
- Water reclamation and packaged wastewater systems
- High purity systems for boiler feed water and other industrial applications
- Locations worldwide to serve the local needs of our clients
