

Build **Faster, Safer** and **Smarter** with STRUX® 90/40.

Grace Construction Products

STRUX® 90/40 macro synthetic fiber reinforcement is the ideal choice for the replacement of WWF. STRUX lets you build:

FASTER — STRUX is the right choice for fast-track construction, eliminating the time and labor associated with installing WWF, resulting in scheduling advantages, improved productivity, and faster completion.

SAFER — With STRUX, there's no more need to lift, carry, hoist, position, store, cut and tie awkward, heavy sheets or rolls of WWF, avoiding the potential for injury and loss of productivity.

SMARTER — It's the economical choice delivering superior performance, with its proven ability to improve durability and longer-term crack control.

Meets the "New" ANSI/SDI (Steel Deck Institute) C1.0 standard for composite steel floor deck for the replacement of temperature and shrinkage reinforcement. STRUX lets you build **FASTER, SAFER** and **SMARTER**.
