

## SOLUTIONS

Design-Build solutions are what set Schuff Steel apart from the typical structural steel fabricator/erector.

From preconstruction engineering services through erection, our innovative approach to project execution has placed us at the head of the class.

Our specialty services include in-house Design-Build/Assist engineering with preconstruction budgeting; 3D detailing and Building Information Modeling (BIM).

Please contact us to schedule a presentation for your team. We can't wait to show you the solutions we can bring to your next project.
