

WHEN CIRCUMSTANCES call for non-traditional approaches to construction – such as accelerated schedules, unique financing options, or multiple vested partners – alternative delivery methods such as design-build and Public-Private Partnerships can be the answer.

Jacobs Carter Burgess knows the unique aspects of the design-build delivery approach and is able to effectively manage the planning, procurement, design, and construction phases of a project. We understand the tools and techniques for managing a design-build project must be consistent with the design-build environment, and we tailor our team to suit the needs of the project. Our experts have both design-build experience and project management qualifications to meet owner's needs, and to help their projects achieve time, cost, and quality requirements. Because of our varied experience with clients from the private, corporate, state, municipal, and federal government sectors, we are qualified to handle any design-build situation.

In November 2007, Carter & Burgess, Inc. was acquired by Jacobs Engineering Group, Inc. Jacobs has over 52,000 employees and provides technical, professional, and construction services globally.
