

The Right Tool, Engineered for People

Document Locator® Enterprise Document Management Software is the right tool for engineering and construction firms to solve collaboration and document control challenges. Like a multi-tool, Document Locator is multifunctional document management software to enhance business efficiency and manage CAD files, designs, documents, project files, email records, and more. Integrations with AutoCAD®, Brava!®, construction project management software like Prolog®, Microsoft Windows®, Office®, and SharePoint® make it **easy for people to use!**

Document Management

Enhance business efficiency and lower risk with version control, notifications, approvals, and more.

Automated Processes

Custom Workflows to automate document routing, review and approval of Change Orders, RFI's, Vendor Submittals, Invoices, and more.

Capture Email Records

An auditable, organized record of email messages, attachments and approvals.

Remote Access

Real-time access and collaboration with satellite offices, project sites, suppliers, architects, contractors and owners.

Security and Auditing

A secure environment with audit trails for all transactions and approvals.
