

Announcement

Upcoming Water Project

The Turlock Irrigation District intends to use a design-build delivery approach for its Regional Surface Water Supply Project, located between the cities of Modesto and Turlock, Calif. Two separate design-build projects are planned:

- 40 MGD Drinking Water Treatment Plant
- 20 miles of Transmission System Pipelines in rural and urban areas.

Preliminary design reports are available to interested design-build firms for both major project components.

Project milestones (preliminary):

Issue Request for Qualifications	October 2007
Issue Request for Proposals	February 2008
Receive Proposals/Conduct Interviews	June 2008
Construction Complete	December 2011

Interested parties should contact Brett Farver, Brown and Caldwell, in Walnut Creek, Calif. at (888) 299-0000, ext. 2513 or bfarver@brwnaald.com. For preliminary design report requests via email, provide the names of the proposed lead firm and major team members (design and construction).
