

We don't just engineer the best products for concrete flatwork...

We engineer success.

Diamond Dowel® System
Load Plate Basket™ Assembly
PD³ Basket™ Assembly
HydraCure™ Covers

PNA's products are engineered for use in a "strategic reinforcement" design that manages the normal behavior of concrete. And, reduce design execution risk by addressing real-world constructibility issues on a job-site.

Outperform even your customers' expectations by delivering serviceable concrete flatwork that meets the latest industry guidelines, optimizes steel and helps mitigate your professional liability.

Call today to see how to incorporate our load transfer, joint protection and wet curing products into your next specification.

Visit us at booth #328 at the Design-Build Conference & Expo
