

Ready to streamline the way  
our people work together.

Microsoft Dynamics™ business management solutions seamlessly connect business systems with the personal productivity tools your people already know. This gives your people easy access to accurate and insightful information that can empower them to work to their full potential.

**Managing to Win.** Successful design-build firms have a reputation for delivering projects on time and on budget. Construction managers who use financial and operational software from Microsoft Dynamics can track and execute projects more efficiently, and deliver a higher quality product to their clients.

Microsoft Dynamics SL supports your existing business processes, instead of requiring you to adapt to the way the software was written, as many systems do. See what Microsoft Dynamics SL users are saying about it:

"Project managers have the information they are hungry for, and now they are in control of documentation and costs."

"Microsoft Dynamics SL provides me with the absolute most information I could ever need or want."

"Creative use of the tools enables managers to quickly identify and focus on areas needing their attention."

"SIS Software and Microsoft Dynamics tied all of our different requirements and processes together into one system."

"Now we can keep up with all our projects and keep our profit margins in line."

"I can't even measure the improvement in reporting because it has increased so dramatically."

SIS Software is an award-winning Gold Certified Microsoft Partner specializing in financial and operational solutions for the construction industry. To find out how we can help your company gain a competitive advantage, call 1.888.844.6599 ext. 267 or email [getinfo@sisn.com](mailto:getinfo@sisn.com).
