

Connecting communities

"We are pleased to be teamed with CH2M HILL for the Golden Ears Bridge Project. Our team provides high value to the owner, and the overall effectiveness of our team was recognized by Infrastructure Journal as the Global Deal of the Year."

—John McArthur, President
Bilfinger Berger BOT, Inc.
Golden Ears Bridge DBFO
Concessionaire

The Golden Ears Bridge, when completed this year, will connect the greater Vancouver communities of Langley and Surrey, and Maple Ridge and Pitt Meadows.

This innovative CAN \$750 million project of Golden Crossing Constructors will improve mobility via a 3,175-foot six-lane extradosed bridge. The project also includes more than 8 miles of new highway and improvements to more than 7 miles of existing roadway. And by using state-of-the-art technology, construction impacts to marine life in the river have been minimized.

CH2M HILL provides innovative design-build solutions on the most technically challenging projects because we are focused on real solutions that connect communities.
